

# Internet-in-a-Box Project

*Resources for the unconnected world*

*Presented by*

**Braddock Gaskill**

*23 February 2014*

*SCaLE 12x*

# Mission

Make Internet content available to the  
unconnected world.

# What is an Internet-in-a-Box?

# What is an Internet-in-a-Box?

- a small, inexpensive device (\$70 - \$250)
- essential Internet resources without any Internet connection.
- a local copy of almost a terabyte of the world's Free information.
- a web interface

# Resources

**Wikipedia:** 37 languages

**Maps:** world-wide to street level

**E-books:** 40,000 books in many languages

**Software:** Open Source. Linux OS with all software package repositories. Source code.

**Video:** 500+ hours of instruction

# For Who?

For schools and communities in the developing world.

# Why?

- Internet access is still expensive and difficult in the developing world
- Inexpensive media now exists that can hold vast offline libraries of information
- Large sources of content are available
- Inexpensive reader devices now exist which can read libraries on media

# Internet Penetration

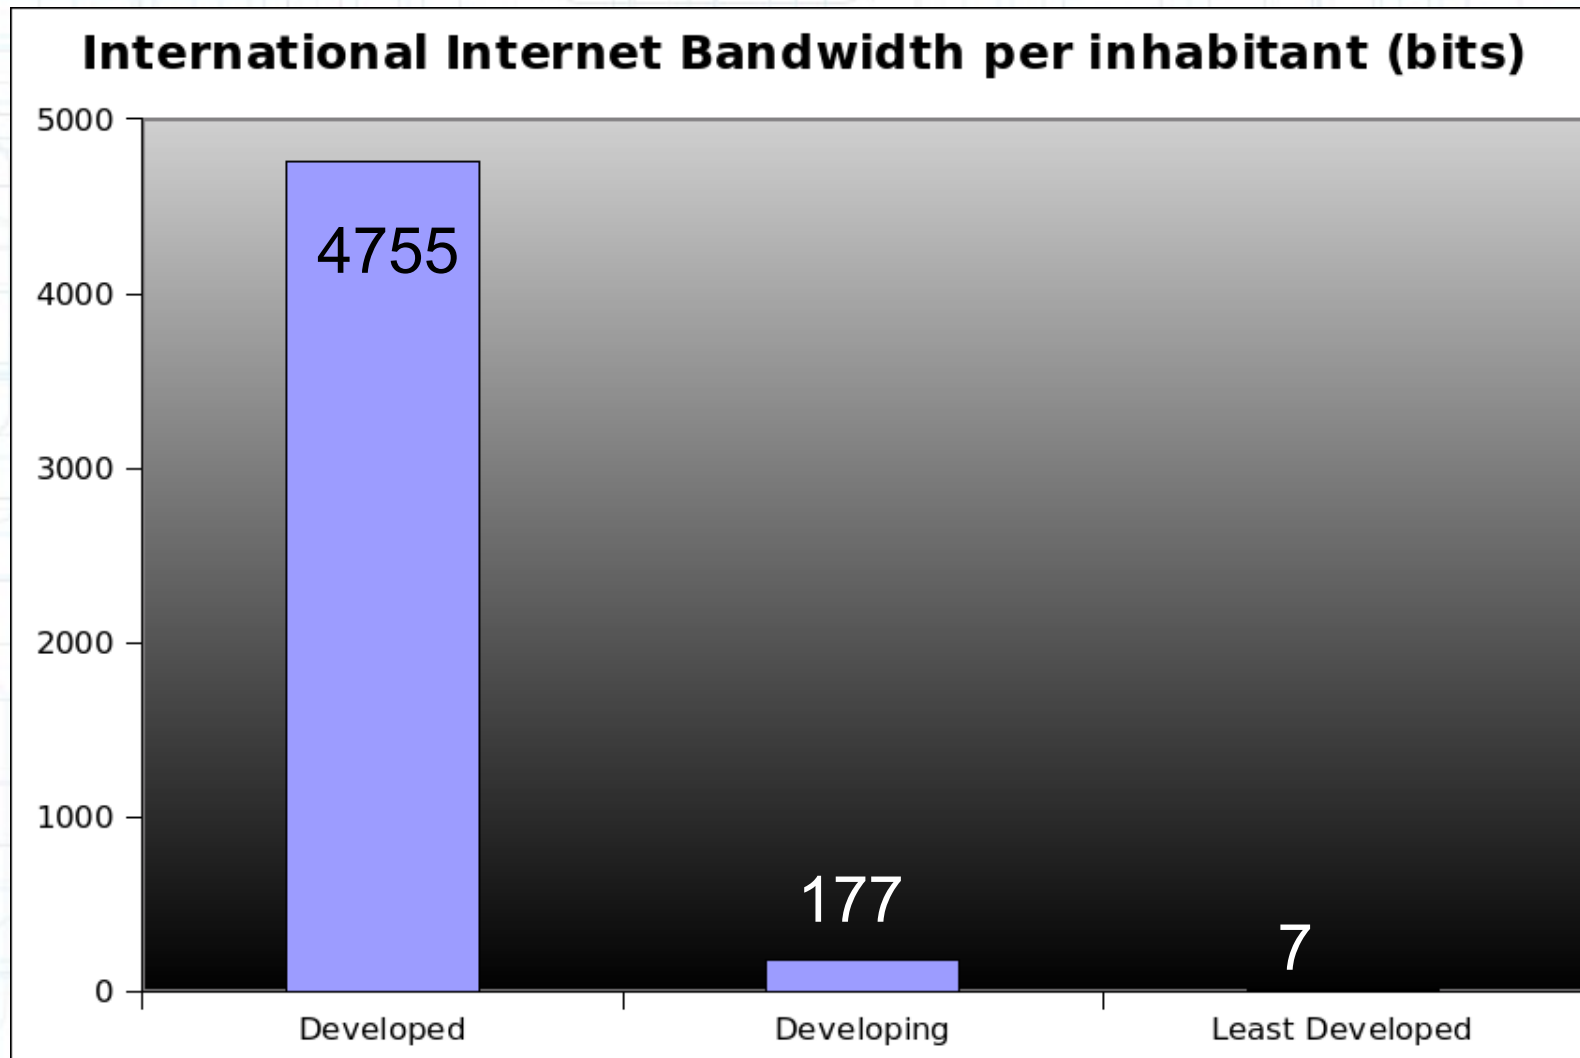

- **70%** use internet in "**developed**" countries
- Only **24%** use internet in "**developing**" countries\*

\* 2013, Napoli & Obar

# Internet Capacity

- Deficit of internet infrastructure

# We Have The Technology

- **Half of the US Library of Congress Printed Collection would fit on ONE hard drive (text only)**

# The Law

You are **NOT** allowed to share most information

# What can we share?

- Open Source
  - Explicitly licensed for sharing
- Public Domain
  - Generally, pre-1923 is Free
  - Congress often retro-actively extending.  
New material from 1923 starting in 2019  
IF nothing changes.
  - Some exceptions, it's complicated

# User Devices

**One Laptop  
Per Child**  
2.5 Million  
laptops

**Tablets**  
\$50 in India

**Phones**  
with wifi

# Wired and Wireless Appliances

## Wireless

- Wifi Hotspot
- Battery

## Wired

- Connect to existing network
- Network appliance

# Co-deployment with School Servers

- One Laptop Per Child Community
  - several Linux-based "School Server" distributions to serve OLPC laptop deployments
  - provide services to LAN including content and tools to keep laptops updated and running smoothly.

# Co-deployment with School Servers

Example: IIAB as USB drive add-on for XSCE School Server

# Co-deployment with School Servers

School Server with IIAB in Haiti

# Project Bernie

- Internet-in-a-Box installation **PLUS**
  - English learning curriculum
  - OLE Nepal 600 children books grades 2-6
  - Old Time Radio shows
  - Classical Music collection
  - OLPC Laptop software collection

**Demo**

# Main Menu

The screenshot shows a Mozilla Firefox browser window titled "Internet-in-a-Box - Mozilla Firefox". The address bar contains "knowledge" and the search bar contains "ubuntu screens". The main content area features a search bar with the text "Under Construction" and a list of menu items: Wikipedia (123), Books (13), Maps (3), Video, Software, and Settings. A chat message at the bottom reads: "Hello world how are you today? This is a chat message. -Braddock".

# Wikipedia

The screenshot shows a Mozilla Firefox browser window with the address bar set to `knowledge/iab/wikipedia/`. The page displays a list of Wikipedia editions with their respective article counts. The browser's address bar includes navigation buttons, a search engine dropdown (set to 'ubuntu screensl'), and a search input field. Below the address bar, there are tabs for 'Most Visited', 'Getting Started', 'PCUES', and 'Read Later'. The main content area lists various language editions of Wikipedia, each with a description and the number of articles.

Language	Description	Articles
Den frie encyklopedi		428,057 Articles
<b>Persian</b>		
ويکيپيڊيا	دانشنامه آزاد	359,731 Articles
<b>Korean</b>		
위키백과	우리 모두의 백과사전	313,509 Articles
<b>Turkish</b>		
<b>Vikipedi</b>	Özgür Ansiklopedi	302,185 Articles
<b>Arabic</b>		
ويکيپيڊيا	لموسوعة الحرة	280,347 Articles
<b>Hebrew</b>

### Search Tips

Search terms will search for matches in book titles and authors.

Multiple terms may be combined with AND, ANDMAYBE, ANDNOT, OR

The search may specify the category to search using the form cat:term where categories include title, creator, contributor, subject, category and language.

# Read

The image shows a screenshot of a Mozilla Firefox browser window. The title bar reads "Wuthering Heights - Mozilla Firefox". The address bar shows the URL "knowledge/static/data/7/6/768/768-h/768-h.htm". The browser's bookmark bar contains "Most Visited", "Getting Started", "PCUES", and "Read Later". The main content area displays the title "WUTHERING HEIGHTS" in a large, bold, black serif font, followed by "CHAPTER I" in a smaller, bold, black serif font. The text of the first chapter begins with "1801.—I have just returned from a visit to my landlord—the solitary neighbour that I shall be troubled with. This is certainly a beautiful country! In all England, I do not believe that I could have fixed on a situation so completely removed from the stir of society. A perfect misanthropist's heaven: and Mr. Heathcliff and I are such a suitable pair to divide the desolation between us. A capital fellow! He little imagined how my heart warmed towards him when I beheld his black eyes withdraw so suspiciously under their brows, as I rode up, and when his fingers sheltered themselves, with a jealous resolution, still further in his waistcoat, as I announced my name."

'Mr. Heathcliff?' I said.

A nod was the answer.

'Mr. Lockwood, your new tenant, sir. I do myself the honour of calling as soon as possible after my arrival, to express the hope that I have not inconvenienced you by my perseverance in soliciting the occupation of Thruscross Grange: I heard yesterday you had had some thoughts—'

'Thruscross Grange is my own, sir,' he interrupted, wincing. 'I should not allow any one to inconvenience me, if I could hinder it—walk in!'

The 'walk in' was uttered with closed teeth, and expressed the sentiment, 'Go to the Deuce:' even the gate over which he leant manifested no sympathising movement to the words; and I think that circumstance determined me to accept the invitation: I felt interested in a man who seemed more exaggeratedly reserved than myself.

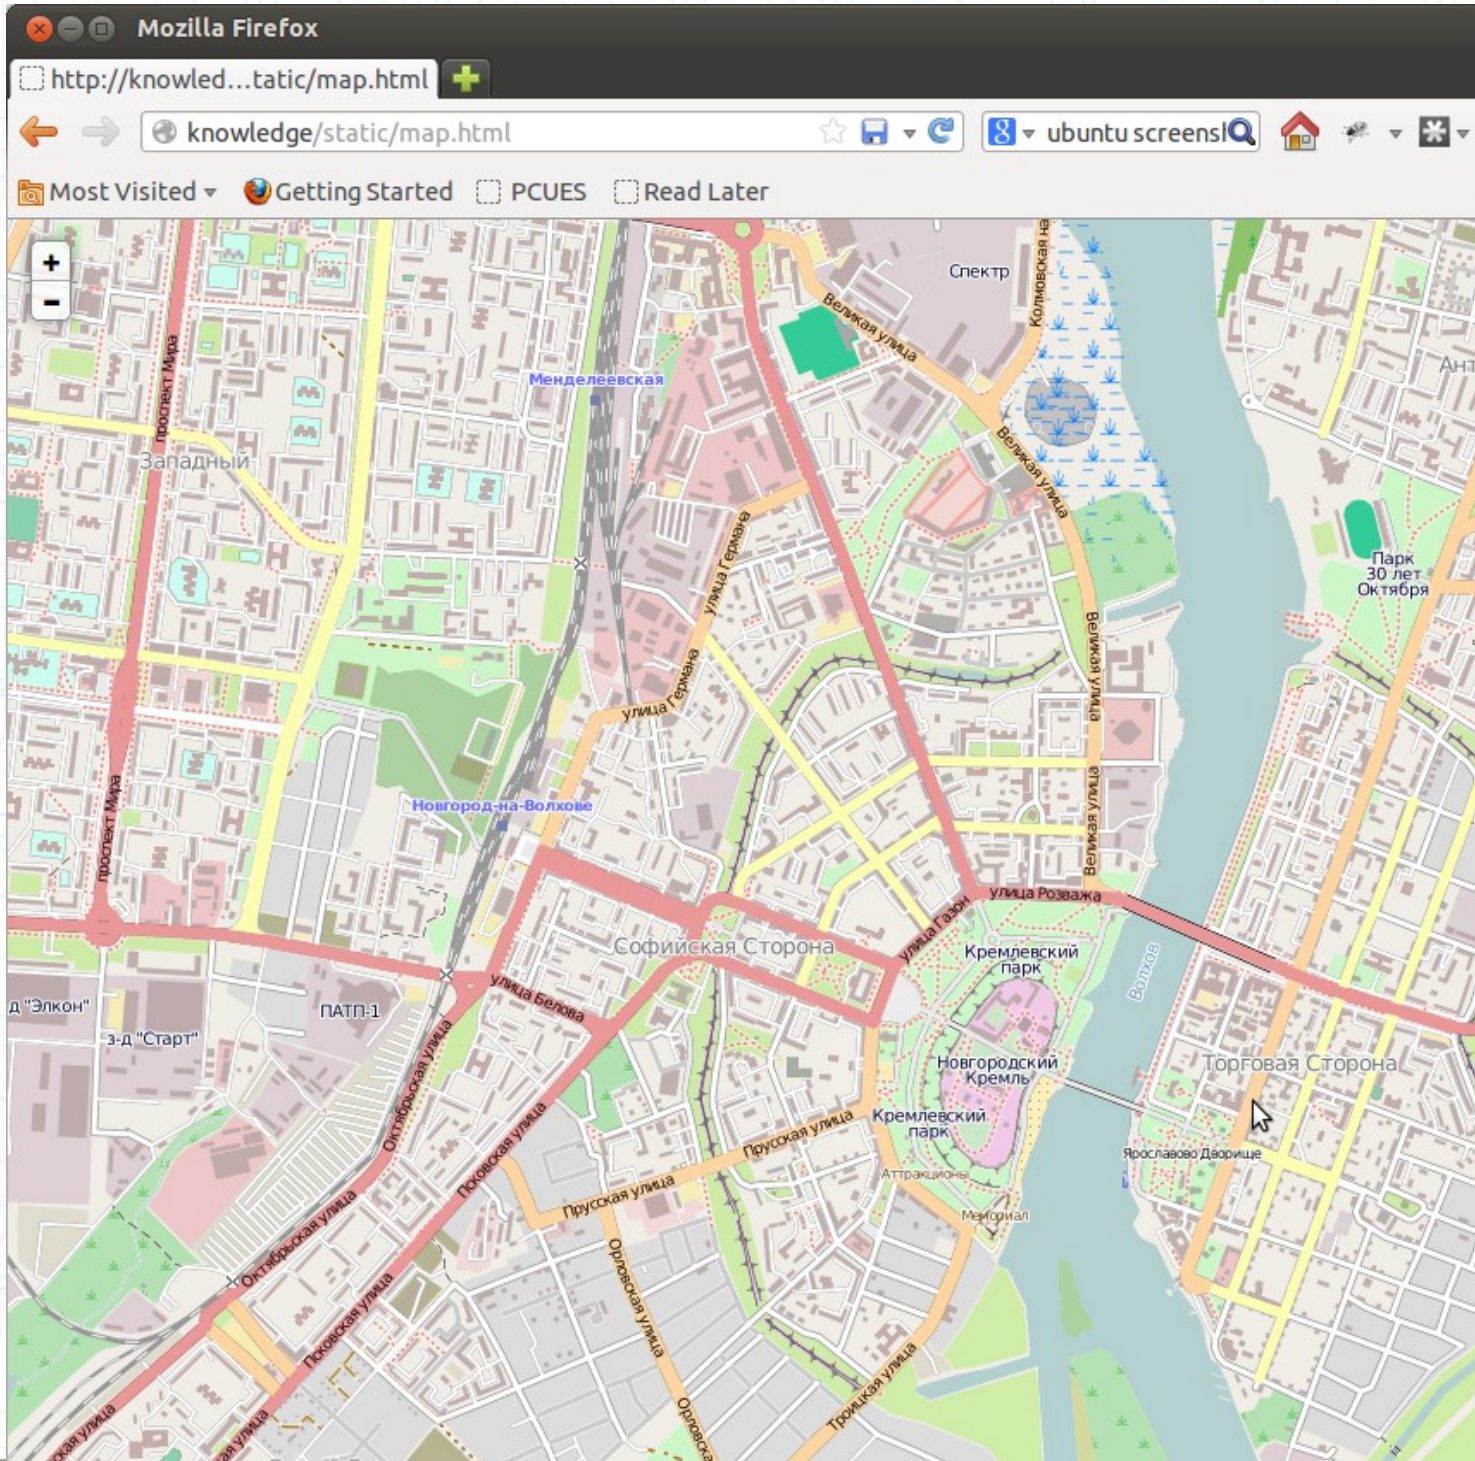

When he saw my horse's breast fairly pushing the barrier, he did put out his hand to unchain it, and then sullenly preceded me up the causeway, calling, as we entered the court,—'Joseph, take Mr. Lockwood's horse; and bring up some wine.'

'Here we have the whole establishment of domestics, I suppose,' was the reflection suggested by this compound order. 'No wonder the grass grows up between the flags, and cattle are the only hedge-cutters.'

Joseph was an elderly, nay, an old man: very old, perhaps, though hale and sinewy. 'The Lord help us!' he soliloquised in an undertone of peevish displeasure, while relieving me of my horse: looking, meantime, in my face so sourly that I charitably conjectured he must have need of divine aid to digest his dinner, and his pious ejaculation had no

Art History > Introduction to Art History > The Basics > Why Look at Art

A handwritten timeline on a black background lists key events in American history. The events are: 1763 Treaty of Paris (1763) (with a red 'X' and a blue arrow pointing to the Boston Tea Party); 1765 Stamp Act (with a blue arrow pointing to the Boston Tea Party); 1773 Boston Tea Party (with a small image of the event); 1776 Declaration of Independence (with a small image of the signing); Revolutionary War (with a small image of a battle scene); 1783 Treaty of Paris (1783) (with a small image of the document); 1787 - created; 1788 - ratified; 1789 - in effect (grouped as 'Constitution'); Washington's two terms as President; 1797; 1803 Louisiana Purchase (with a small map of the Louisiana Purchase). To the right of the timeline are three images: a map of the British Colonies in North America (1770-1775), a map titled 'U.S. TERRITORIAL ACQUISITIONS' showing the Louisiana Purchase and other acquisitions, and a small image of a historical scene.

# Deployments: the first year

# Deployments

- Direct trials with IIAB Appliances
- Indirect deployments with OLPC School Server community

# Sierra Leone

# Sierra Leone

# Haiti

# Part 2: Behind the Data

# Wikipedia

- Seventh highest ranked web site in the world
- Fully Open Source content

# Wikipedia

- Using OpenZim files
- Zim files
  - A container file format designed FOR Wikipedia
  - Wikipedia pre-rendered to HTML, HTML stored in Zim file
  - Zim Torrents prepared by the Kiwix community

# Wikipedia: The Data

## Zim community

- Provides pre-rendered Wikipedia ZIM torrents for 37 languages
- Many include scaled images
- Some a few years stale

# Wikipedia

- Not rich in all languages

Number of articles for top languages

# Maps

- Open Street Maps
  - Open Source effort to map the world
  - Merge data from many sources (government, donated, created)
  - Open Data Commons Open Database License (ODbL)
  - LeafletJS JavaScript app

# Maps Process

1. Download "Planet" File (**30GB** binary)
2. Import Planet into PostgreSQL DB
  - **350 GB** final DB size (!)
  - Import took 4 days
3. Render DB to image tiles (PNG)
  - 1 week with a couple machines clustered
4. Pack image tiles
  - **~100 GB**

# Serving Maps

- Low end machines are too slow to render vector maps
- We pre-render EVERYTHING
- 4,096 PNG images per file
- Redundant tiles removed (many many!)
- Python back-end extracts and serves images

# Books

- Project Gutenberg, founded 1971
- 40,000 e-books, mostly Public Domain
- Custom Web UI (Thanks Joel!)

# Books Process

- Project Gutenberg Archive
  - PG Archive is a mess
  - Many formats, most redundant
  - Ex: archive contains ISOs of prior versions of the archive (!)
- Mirror
  - Rsync service slow (throttled?) and unreliable
  - **~1.5 weeks**
- Extract and convert all books to HTML and ePub

# Video

- 4,000 Khan Academy Videos
- **Non-Commerical Use Creative Commons License**
- High demand for Spanish and French

# Meet the Hardware

## Seagate Wireless Plus

- \$200
- Wireless Harddrive
- 1TB
- Argo Linux firmware
- Telnet root/goflex
- Uboot – working on Debian
- We run chroot debian

# Meet the Hardware

## Seagate GoFlex Home

- 1TB Low-end NAS
- \$150
- Ethernet 1Gbps
- Debian Arm Linux installed

# IIAB Volunteers

- **Joel Steres** – Gutenberg, map search
- **James McDuffie** – Wikipedia search, web site, mailing list
- **John Kim** – Testing and Release Manager
- **Lan Dang** – Maps, Outreach
- **UI Translations** – Pootle community
  - **Chris Leonard and his translation team**

# Upstream Projects

- **Books** – Project Gutenberg
- **Wikipedia** – OpenZim Community
  - **Emmanuel Engelhart** (kiwix)
- **Maps** – Open Street Map
- **Video** – Khan Academy, Zurd torrent
- **Software** – Ubuntu, Linux community
- **Arm Hardware**
  - **Mike Brown** and **Jeff Doozan** (uboot)

# Thanks to partners

- XSCE School Server Community
- Unleash Kids
- Project Bernie, Tony Anderson
- Wonderful field trial volunteers

# Resources

**Braddock Gaskill**

Internet-in-a-Box Project Lead

[braddock@braddock.com](mailto:braddock@braddock.com)

<http://internet-in-a-box.org>

**END**

# Meet the Hardware

## Behind the scenes

- Job Server "**Node-8**"
  - 8GB RAM, Quad Core 2.5GHz, 1TB HDD
- Job Server "**Node-16-SSD**"
  - **16GB RAM, 500GB SSD**, Quad Core 3GHz, 6TB HDD

# Future: Open Source Textbooks

- Aka "Open Educational Resources" (OER)
- Many models emerging
  - State-funded Model
    - California Open Source Textbook Project
    - State of California spends \$400 million per year on textbooks
  - Volunteer-driven Model
    - South Africa – Free High School Science Texts (FHSST)
      - Math and Science high school curriculum
    - WikiBooks Project
      - 2,000+ books "in progress", few finished

# Future: Open Source Textbooks

- Many models emerging
  - Publisher Model
    - Flat World Knowledge (Publisher)
    - 40+ Textbooks, all English
    - Publisher and author make money off print copies and formatted downloads
  - University-driven Model
    - MIT Open Courseware
    - College course material provided both for students and others

# Humane Reader

# Humane Reader

- Displays to television set
- Reads Micro-SD Card (2GB)
- Optional PS/2 Keyboard
- Wikipedia reader
- \$20 in quantity

# Humane Reader

- Minimalist design
  - Uses two 8-bit microcontrollers
  - Specs of a 1977 Apple II computer
- Cell phone standard micro-USB power
- Open Source Design
  - Effort to build community around platform
- Arduino expansion slots
- Can be used as simple 8-bit computer
