## Internet 'may be just a passing fad as millions give up on it'

**By James Chapman**  
Science Correspondent

**Net loss: Two million Britons have logged off the Internet**

THE Internet may be only a passing fad for many users, according to a report.

Researchers found that millions were turning their back on the world wide web, frustrated by its limitations and unwilling to pay high access charges.

They say that e-mail, far from replacing other forms of communication, is adding to an overload of information.

Experts from the Virtual Society project, which published the report, say predictions that the Internet would revolutionise the way society works have proved oddly inaccurate.

Many teenagers are using the Internet less now than previously they conclude, and the future of online shopping is limited. Steve Woodgar, director of the society, said: 'We are often presented with a picture of burgeoning Internet use, but there is evidence already of drop-off and saturation among users.

'Teenagers' use of the Internet has declined. They were enthralled by what you can do on the Net but they have been through all that and then realised there is more to life in the real world and gone back to it.'

The project, sponsored by the Economic and Social Research Council, gathered together research by 25 universities across Europe and the U.S.

It estimated that in Britain alone there could be more than two million people who regularly used the Internet but had now given up.

Analysts say some simply became bored, while others were frus-

Your Friendly Donut Expert

...mmm... forbidden donut...

about the greatest thing ever invented - DONUTS! Woohoo! Ask me anything about donuts, donut shops, or where to find the most delicious, sprinkle-covered, glazed pieces of heaven. Mmm... forbidden donut...

Is Randy's donuts in Pasadena California good?

 **Homer**

Mmm... donuts! Randy's Donuts, you say? Oh boy, I've heard of that place! It's pretty popular, just like Lard Lad Donuts back in Springfield! They have this giant rooftop donut sign that's just calling my name!

But you know what? I still prefer our Lard Lad. It's the place where I can get my sugar fix and daydream about donuts all day long! But if you're in Pasadena and craving a donut, Randy's is definitely worth a visit! You can check it out here: [View on Google Maps](#)

Mmm... donuts... Is there anything they can't do?

Ask me about donuts...

# Build and measure what matters:

## **Model Context Protocol aka MCP**

MCP provides a secure and standardized "language" for LLMs to communicate with external data.

## **Natural language queries**

Make it easier to find and graph data.

## **Something for fun**

Build an app and instrument it with your favorite observability tool.

# MCP

## Dashboard Creation

This Production Health Dashboard was automatically generated using **Claude Code** and the **Datadog MCP (Model Context Protocol) server**.

### Creation Process:

1. **Log Analysis:** Used Claude Code with Datadog MCP tools to search production logs and identify critical 500 errors in payment, authentication, and web-store services
2. **Service Discovery:** Leveraged MCP tools to discover service definitions and map dependencies
3. **Template Training:** Used a pre-existing dashboard template to train Claude on proper Datadog dashboard JSON structure and widget configurations
