The Dilemma

Game Days

Failure Fridays
Failure Anydays

<https://www.pagerduty.com/blog/failure-friday-at-pagerduty/>

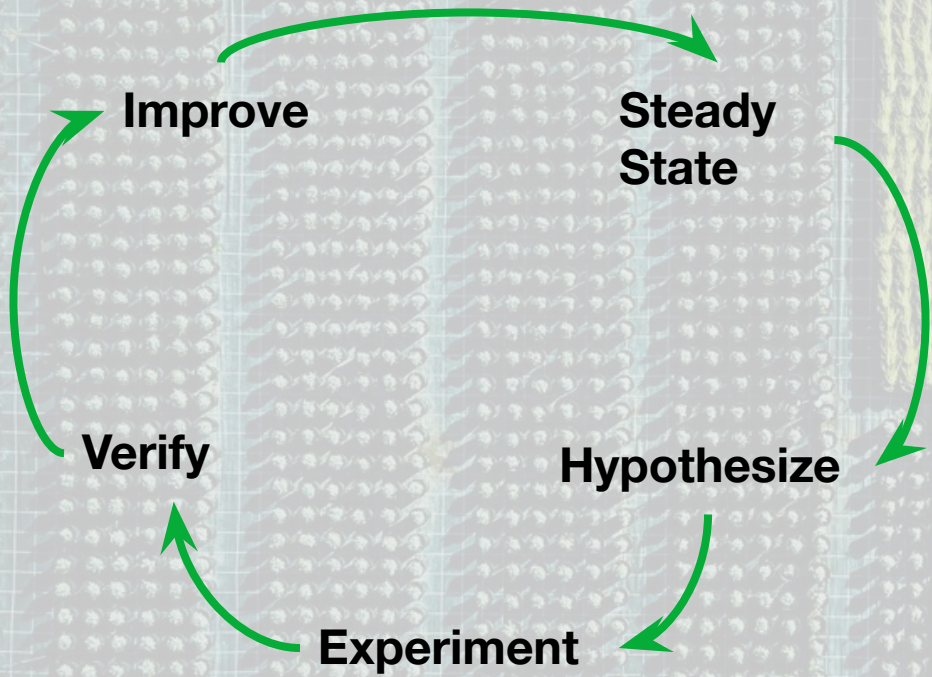

Create
WITH PURPOSE
Experiment
WITH MEANING

An aerial photograph of a small boat in a lake, with several vertical green bars on the right side of the image. The text is overlaid on the left side of the image.

PagerDuty

Chaos Engineering lets you compare what you think will happen to what actually happens in your systems. You literally "**break things on purpose**" to learn how to build more resilient systems.

– Gremlin.com

Use Chaos Engineering to validate your ecosystem

Be Intentional

Learn

Improve

**Customer
Focus**

Prerequisites

Incident Response

Replace **Chaos**
with **Calm**

Get **organized**

Be **explicit**

Testing IR During Game Days

Alerts

Notifications

Coordination

**Troubleshooting
and Resolution**

officerurl APP 1:07 PM

Fz is starting, follow along in [#failure-friday](#)

officerurl APP 1:31 PM

Fz is over, catch up in [#failure-friday](#)

Set Goals

“Did we really fix X?”

“Customers reported Y, but we can't duplicate in integration.”

“Could we withstand a DDOS to these key systems?”

Hypothesize

Scale up?

Fall over?

Slow down?

Graceful replacement?

What Actually Happened?

Were your dreams made reality? Or your darkest nightmares?

What Did You Learn

Talk About It

Improvements

Get your
learning back
into the
product cycle

Revising and Revisiting SLOs

SLOs are **internal** tools!

You can **change** them if they no longer work **for you!**

Surprise!

When to Game Day?

When the system has been stable, and **SLOs** are **safe**!

Don't blow out y
our **error budget** on testing.

When to NOT Game Day?

Summary

- Have a plan
- Be intentional
- Use what you learn
